Technologies: AJAX; Git; RESTful API; Elasticsearch; Microsoft Azure; Nginx; Firebase; OpenSSL ...

Tools: Eclipse; Visual Studio; Xcode; Sublime; Dreamweaver; Android Studio; Vagrant; Docker; Ngrok ...

Work Experience

CTO, Co-Founder – RHBoys

- ▲ Started Kicks4Love web and app from scratch by using Ruby on Rails and React Native.
- ▲ Set up fast and secure Nginx web server that enable Gzip compression, leverage browser caching, and prevent DDoS attack.
- ▲ Engaged in DevOps work environment with constant software updates and releases.

eCommerce Web Developer – Jewlr.com

- ▲ Added new features to public commercial website and internal management system around Ruby on Rails MVC framework.
- ▲ Individually implemented numerous payment methods such as Apply Pay on web, PayPal, ACH and Affirm, with integration of payment processors such as Stripe and Braintree.
- ▲ Utilized Vagrant and Docker to develop the software that shipped and deployed in daily basis.

eCommerce Software Developer

– Ashlin BPG Marketing INC:

- ▲ Independently designed, developed, and tested various software using C# and Visual Studio as main stack.
- ▲ Developed financial applications for end-users using C#, .Net (ASP.Net), SQL Server, and JavaScript.
- ▲ Engaged in cloud computing to host database, web app and improve security on Azure.
- ▲ Wrote multiple advanced SQL scripts in order to achieve better interaction between client and database.

Projects

Liang-Hsuan Ma – lhm.rocks:

- ▲ A responsive and mobile friendly personal website with many cool user interface designs.
- ▲ Constantly improving the website as new technologies released.

Kicks4Love – kicks4love.com:

- ▲ Collaborating with other trend enthusiasts to produce a latest sneakers information website.
- ▲ Dedicated to front-end design and user experience to ensure page visits.

The Survival Game – survivalgameonline.com:

- ▲ An online multiplayer game with a traditional game-looking theme.
- ▲ Developing while learning for my first game project at EngHack 2016 within 36 hours.

Order Manager:

- ▲ A desktop application that can manage orders from various online shopping channels.
- ▲ A flexible and modularized software due to multi-channel handling.
- ▲ Plenty of data manipulation, data processing and data exchange via XML, JSON and CSV files.
